**Performance Management for Immediately Reportable and 24 Hour Reportable Communicable Disease:**

- Immediately reportable diseases are responded to and investigated immediately 100% of the time.
- 24 hour reportable diseases are responded to and investigated on the same day, or on the next day 100% of the time.

**\*Included in this report are MCRHC towns and Middletown.**

**\*Since March 2021, Confirmed cases of Novel Coronavirus 2019 (SARS CoV2) have decreased by over 1,000 cases (cut in half). Total cases reported of Novel Coronavirus 2019 have decreased by about 2,000 cases. Despite this, the positivity rate has increased by about 41.6% since the previous month (March 2021). This is due to the number of cases reported dropping in number, and possibly due to a decrease in testing (general) this month (April 2021).**

**\*Currently, more individuals are vaccinated than before, in Monmouth County and in NJ. This could account for the great decrease in COVID-19 Confirmed cases for April 2021.**
